

WHAT'S INCLUDED IN YOUR TIMBER FRAME PACKAGE

If you can dream it, we can build it. A Woodhouse timber frame package can be either custom-made from scratch or predesigned. Our highly skilled project management team will guide you through the entire process and support your contractor in the installation of your Woodhouse package through the finishing of your home, whether it's a traditional timber frame New English Cabin or a modern mountainside retreat.

BASIC PACKAGE COMPONENTS

DESIGN An iterative sketch process maturing design ideas with 3D modeling and “fly-through” technology culminating in full detailed construction drawings – everything your builder needs to get permitted and execute the build.

TIMBER FRAME Pre-cut with fully housed mortise and tenon joinery on a CNC lathe and hand finished with 1” hardwood peg fasteners.

WALL ENCLOSURES CNC pre-cut wall SIPs, drywall (MoldTough™ mold and moisture-resistant blueboard) for exterior walls, plus all specialty fasteners.

SECOND-FLOOR SYSTEM If your design calls for a timber joist system and 2X8 tongue and groove decking, we will provide it with the package. If a more conventional floor system is called for, you will procure this locally.

ROOF ENCLOSURE SYSTEM CNC pre-cut roof SIPs, drywall (MoldTough™ mold and moisture-resistant blueboard) with optional 1X8 tongue and groove sheathing.

EXTERIOR WINDOWS, DOORS AND SKYLIGHTS Specialty entry doors can also be provided.

WOODHOUSE TECHNICAL REPRESENTATIVE A Woodhouse Technical Representative to guide your builder.

For any questions, please contact your Regional Project Manager (RPM) or Woodhouse Independent Builder-Dealer (IBD).
